## **INTRODUCTION**

The Tippecanoe County Government mission is to provide responsive, high-quality services that enhance and maintain self-sufficiency, personal safety, economic opportunity, mutual respect and quality of life for present and future generations. This transition plan reflects that mission with the intent to meet and exceed the minimum requirements established under the ADA and its implementation regulations.

Tippecanoe County Highway prepared this plan and self-evaluation in accordance with Title II of the Americans with Disabilities Act of 1990, as amended (ADA) and its implementing regulations. It considers current existing facilities, policies and practices in order to identify and correct those items that create possible access barriers for persons with disabilities. This transition plan outlines the recommended procedures for implementing and scheduling remedial work needed to comply with the ADA.

This plan details the methods and procedures Tippecanoe County Highway will use to monitor its activities and facilities for compliance with the ADA. Tippecanoe County Highway will use this plan to determine under the ADA what changes it needs to make to its programs and/or the design and construction of its facilities to ensure persons with disabilities are not excluded from programs, services and activities because the programs or facilities are inaccessible.

## **PLAN DEVELOPMENT**

In November of 2011 the Tippecanoe County Board of Commissioners passed ordinance number 2011-30-CM, Americans with Disabilities Act Implementation. This ordinance declared that all county facilities that are constructed or altered shall be in accordance with the ADA, ADAAG, and PROWAG as they apply.

## **ADA PROJECT TEAM**

Ordinance 2011-30-CM established an ADA Project Team that shall be an advisory body to the Board of Commissioners regarding the design, construction, alteration or operation of county facilities. The team shall consist of five members, one member of the Board of County Commissioners, one member of the County Council, the Executive Director of the Highway Department, the County Human Resources Director, and the Commissioners Assistant.

## **ADA COORDINATOR**

The Board of Commissioners shall annually appoint one member of the ADA Project Team to serve as the ADA Coordinator for the county. The ADA Coordinator shall ensure the county's effort to comply with and carry out responsibilities under Title II of the Americans with Disabilities Act by communicating all complaints and grievances received with the ADA Project Team and responding to the complainant.

## **GRIEVANCE PROCEDURE**

The ordinance also created the Grievance Procedure as required by the ADA to be used by anyone who wishes to file a complaint with the county alleging discrimination on the basis of disability by the County of Tippecanoe. The detailed procedures and complaint form are attached with the implementation ordinance and are included in the appendices of this document.

## **SELF EVALUATION**

Evaluation and inventory of sidewalks and curb ramps are accomplished with a variety of means including existing road inventory data, GIS aerial views, and field conducted inspections. The Highway Department will continue the task of updating data as improvements and additions to the roadway network are completed.

## **CONSTRUCTION STANDARDS**

Construction within the county right-of-way shall be done to the current county and state design guidelines and specifications as they apply.

## INVENTORY DATA COLLECTION

Inventory priority areas were determined based on existing development and surrounding facilities. From this data the Traffic and Pedestrian Generator Map was developed and was then used to determine field survey locations. The following data was collected in these areas:

### Sidewalks

- Material type
- Width
- Condition rating (good/fair/poor)
- Obstructions

### Curb Ramps

- Corner location and type of ramp (INDOT Type)
- Width
- Running, cross, gutter, and flare slopes
- Landing size and flush transitions
- Flare sides, obstructions, or grass utility strip
- Detectable warning installed
- Crosswalk markings per IMUTCD
- Ramps within driveways

Inspections were conducted using a curb ramp survey form and instructions found through the United States Department of Justice ADA Home Page web site. The form provided a simple way of recording data and the quick determination if a ramp is in violation of any of the required standards. The form and instructions are included in the appendices of this document.

## METHODOLOGY FOR IMPLEMENTATION

Priority for the implementation of improvements may be determined based on the same priority system used in creating the Traffic and Pedestrian Generator Map and conducting the inventory. Furthermore, the county will use the data collected during the inventory of curb ramps and intersection crossings to commit available resources to the reconstruction of existing curb ramps and crossings not currently in compliance with the ADA.

The facilities that were evaluated first were the sidewalks and ramps within the 30 defined areas of the Traffic and Pedestrian Generator Map. There are approximately 525 intersections within the 30 areas. Of these intersections, 313 have some sidewalks and of those, 263 have ramps. In most cases the ramps and sidewalks are wide enough. The main existing issues are slope of the ramp, lip or gap at the curb, and lack of detectable warning devices (truncated domes).

Outside of the 30 Traffic and Pedestrian Generator Areas, very few areas remain that aren't rural in nature. Those areas are the lowest priority for replacement or installation of ramps and sidewalks. Most areas will require neither but will be evaluated on a case by case basis. These areas will also be evaluated and moved up in priority if a traffic generator (school, park, business, etc.) should develop in the area and result in pedestrian traffic.

Tippecanoe County will determine actual ADA improvements by the condition of the facility at the time of the project. The absence of the facility from the inventory will not prohibit ADA work from being completed. During planning and construction the county will utilize and consider all available resources for the most efficient and effective ADA projects and improvements.

Locations for improvements to sidewalks and curbs will be prioritized. The following criteria will be used to prioritize the improvements:

1. The locations for needed curb and sidewalk improvements are located within the 30 generator areas.
2. The locations for needed curb and sidewalk improvements are located near current roadway construction projects.
3. The locations for needed curb and sidewalk improvements are referenced in the 2040 Metropolitan Transportation Plan.
4. Public input has been received concerning a needed improvement for pedestrians.

The first priority will be the facilities within the 30 generator areas. Along with the traffic generator area, priority will be given to areas that are near current roadway projects. Examples would be any areas that tie into the newly completed McCarty Lane project or areas that into roadways that will be under construction soon such as Cumberland Avenue. Naturally the areas where roadway improvements are in progress or will be under construction soon are also within the highest traffic generator areas.

Both within and outside of the Traffic and Pedestrian Generator Areas, the 2040 Metropolitan Transportation Plan – Completing Our Streets will be followed. This document, adopted by Tippecanoe County in 2012, outlines the planning and prioritization process established to address all access needs in Tippecanoe County.

To implement the Transition Plan, \$20,000 will be set aside for ramps construction and/or reconstruction for 2013. The first year will be used to answer several questions about the amount of money to be budgeted. In-house construction versus contractor construction will be evaluated. Ramp repair versus ramp reconstruction will also be evaluated. Stand alone projects versus blanket projects for a specific geographic areas will also be reviewed. This process will take place in conjunction with the annual analysis of the road inventory to determine which roadways are in need of resurface, chip/seal, repairs, etc. Analysis of the first year of work will be used to determine how much should be budgeted for each of the coming years.

Tippecanoe County Highway is committed to following the guidelines set forth in this Transition Plan and Self-evaluation while actively revising and amending these documents as new information is discovered and facility improvements are made.

# Appendix A

Ordinance 2011-30-CM

**ORDINANCE NO. 2011- 30 -CM**  
**AMENDING TIPPECANOE COUNTY CODE**  
**ADDING NEW CHAPTER 31.400**

**AMERICANS WITH DISABILITIES ACT IMPLEMENTATION**

**WHEREAS**, the Board of Commissioners desires to establish an Americans with Disabilities Act Project Team and Coordinator to advise and assist with implementation of the Americans with Disabilities Act of 1990 "ADA" and to establish procedures for responding to greivances with respect thereto.

**NOW, THEREFORE, BE IT ORDAINED** by the Board of Commissioners of Tippecanoe County, Indiana, that the Tippecanoe County Code be amended to add a new Chapter 30.400 reading as follows:

**§ 31.400      AMERICANS WITH DISABILITIES ACT IMPLEMENTATION.**

Facilities that are constructed or altered by, on behalf of, or for the use of Tippecanoe County shall be designed, constructed, or altered to be readily accessible to and usable by individuals with disabilities, in accordance with the Americans with Disabilities Act , the United States Department of Justice ADA Accessibility Guidelines (ADAAG) and the Unites States Department of Transportation Public Rights-of-way Accessibility Guidelines (PROWAG) as they apply to the county.

**§ 31.401      ADA PROJECT TEAM; ESTABLISHMENT; MEMBERS.**

(A)    There is hereby created an Americans with Disabilities Act Project Team which shall consist of the following persons appointed by the Board of Commissioners:

1.      One member of the Board of County Commissioners;
2.      One member of the County Council;
3.      The Executive Director of the Tippecanoe County Highway Department
4.      The Tippecanoe County Human Resources Director
5.      The Commissioners Assistant appointed pursuant to County Code Section 30.05

(B)    Each member shall be appointed for a term of one year commencing on January 1 of each year and shall serve until his or her successor is appointed and qualified.

(C) The Americans with Disabilities Act Project Team shall be an advisory body that will meet as required and make written recommendations to the Board of County Commissioners regarding the design, construction, alteration or operation of Tippecanoe County facilities and their accessibility and usability by individuals with disabilities, in accordance with the Americans with Disabilities Act of 1990 "ADA" and such other duties as may be assigned by the Board of Commissioners.

(D) The Board of Commissioners shall annually appoint one member of the ADA Project Team to serve as the ADA Coordinator for the county.

#### **§ 31.402 GRIEVANCE PROCEDURE**

(A) This Grievance Procedure is established to meet the requirements of the Americans with Disabilities Act of 1990 ("ADA"). It may be used by anyone who wishes to file a complaint alleging discrimination on the basis of disability in the provision of services, activities, programs, or benefits by the County of Tippecanoe. The County's Personnel Policy governs employment-related complaints of disability discrimination.

1. The complaint should be in writing and contain information about the alleged discrimination such as name, address, telephone number of complainant and location, date and description of the problem. Alternatives means of filing complaints, such as personal interviews or a tape recording of the complaint, will be made available for persons with disabilities upon request.
2. The complaint should be submitted by the grievant and/or his/her designee as soon as possible but no later than 60 calendar days after the alleged violation to:

ADA Coordinator  
County Commissioners Office  
20 North Third Street  
Lafayette, IN 47901

3. Within 15 calendar days after receipt of the complaint, the ADA Coordinator and two other ADA Project Team members will meet with the complainant to discuss the complaint and the possible solutions. Within 15 calendar days of the meeting, the ADA Coordinator will respond in writing, and where appropriate, in a format accessible to the complainant, such as large print, Braille, or audio tape. The response will explain the position of the County and offer options for substantive resolution of the complaint.

4. If the response by the ADA Coordinator or his/her designee does not satisfactorily resolve the issue, the complainant and/or his/her designee may appeal the decision within 15 calendar days after receipt of the response to the entire ADA Project Team.
5. Within 15 calendar days after receipt of the complaint, the ADA Project Team will meet with the complainant to discuss the complaint and the possible resolutions. Within 15 calendar days of the meeting, the ADA Project Team will respond in writing, and where appropriate, in a format accessible to the complainant. The response will explain the position of the ADA Project Team and offer options for substantive resolution of the complaint if different from those indicated by the sub-ADA Project Team in the first step.
6. If the response by the ADA Project Team does not satisfactorily resolve the issue, the complainant and/or his/her designee may appeal the decision within 15 calendar days after receipt of the response to the Board of Commissioners.
7. Within 15 calendar days after receipt of the appeal, the Board of Commissioners will meet with the complainant to discuss the complaint and possible resolutions. Within 15 calendar days after the meeting, the Board of Commissioners will respond in writing, and, where appropriate, in a format accessible to the complainant, with a final resolution of the complaint.
8. All written complaints received by the ADA Coordinator, appeals to the ADA Project Team, appeals to the Board of Commissioners, and responses from these groups will be retained by Tippecanoe County for at least three years.

This Ordinance shall be in full force and effect immediately upon its passage and signing.

Presented to the Board of Commissioners of Tippecanoe County, Indiana, and approved on first reading this 21<sup>st</sup> day of November, 2011, by the following vote:

## ADA Notice

### NOTICE UNDER THE AMERICANS WITH DISABILITIES ACT

In accordance with the requirements of the Americans with Disabilities Act of 1990, Tippecanoe County will not discriminate against qualified individuals with disabilities on the basis of disability in the County's employment, services, programs or activities.

**Employment:** The County does not discriminate on the basis of disability in its hiring or employment practices and complies with all regulations promulgated by the U.S. Equal Employment Opportunity Commission under the Americans with Disabilities Act (ADA).

**Effective Communication:** The County will generally, upon request, provide appropriate auxiliary aids and services leading to effective communication for qualified persons with disabilities so they can participate equally in the County's programs, services, and activities, including qualified sign language interpreters, documents in Braille, documents in alternative formats, and other ways of making information and communications accessible to people who have speech, hearing, or vision impairments.

**Modifications to Policies and Procedures:** The County will make all reasonable modifications to policies and procedures to ensure that people with disabilities have an equal opportunity to enjoy all County programs, services, and activities. For example, individuals with service animals are welcomed in County offices, even where pets are generally prohibited. The County will not impose unnecessary eligibility standards or rules that deny individuals with disabilities the opportunity to participate in service, programs or activities.

**Surcharges:** The County will not place a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the cost of providing auxiliary aids/services or reasonable modifications of policy, such as retrieving items from locations that are open to the public but are not accessible to persons who use wheelchairs.

**Architectural Barriers:** The County will take all required action to provide access to its building and facilities to individuals with disabilities.

**Fundamental Alterations/Undue Burden:** The ADA does not require the County to take any action that would fundamentally alter the nature of its programs or services, or impose an undue financial or administrative burden.

**Requesting an Accommodation:** Anyone who requires an auxiliary aid or service for effective communication, or a modification of policies or procedures to participate in a County program, service or activity, should contact the ADA Coordinator, at 765-423-9772 as soon as possible but not later than 48 hours before the scheduled event.

**Complaints:** Complaints that a County program, service, activity, or facility is not accessible to persons with disabilities should be directed to:

ADA Coordinator  
%Tippecanoe County Commissioners Office  
20 N 3<sup>rd</sup> St  
Lafayette, IN 47901

TIPPECANOE COUNTY  
GRIEVANCE PROCEDURE UNDER  
THE AMERICANS WITH DISABILITIES ACT

This Grievance Procedure is established to meet the requirements of the Americans with Disabilities Act of 1990 ("ADA"). It may be used by anyone who wishes to file a complaint alleging discrimination on the basis of disability in the provision of services, activities, programs, or benefits by the County of Tippecanoe. The County's Personnel Policy governs employment-related complaints of disability discrimination.

The complaint should be in writing and contain information about the alleged discrimination such as name, address, telephone number of complainant and location, date and description of the problem. Alternatives means of filing complaints, such as personal interviews or a tape recording of the complaint, will be made available for persons with disabilities upon request.

The complaint should be submitted by the grievant and/or his/her designee as soon as possible but no later than 60 calendar days after the alleged violation to:

ADA Coordinator  
County Commissioners Office  
20 North Third Street  
Lafayette, IN 47901

Within 15 calendar days after receipt of the complaint, the ADA Coordinator and two other ADA Project Team members will meet with the complainant to discuss the complaint and the possible solutions. Within 15 calendar days of the meeting, the ADA Coordinator will respond in writing, and where appropriate, in a format accessible to the complainant, such as large print, Braille, or audio tape. The response will explain the position of the County and offer options for substantive resolution of the complaint.

If the response by the ADA Coordinator or his/her designee does not satisfactorily resolve the issue, the complainant and/or his/her designee may appeal the decision within 15 calendar days after receipt of the response to the entire ADA Project Team.

Within 15 calendar days after receipt of the complaint, the ADA Project Team will meet with the complainant to discuss the complaint and the possible resolutions. Within 15 calendar days of the meeting, the ADA Project Team will respond in writing, and where appropriate, in a format accessible to the complainant. The response will explain the position of the ADA Project Team and offer options for

substantive resolution of the complaint if different from those indicated by the sub-ADA Project Team in the first step.

If the response by the ADA Project Team does not satisfactorily resolve the issue, the complainant and/or his/her designee may appeal the decision within 15 calendar days after receipt of the response to the Board of Commissioners.

Within 15 calendar days after receipt of the appeal, the Board of Commissioners will meet with the complainant to discuss the complaint and possible resolutions. Within 15 calendar days after the meeting, the Board of Commissioners will respond in writing, and, where appropriate, in a format accessible to the complainant, with a final resolution of the complaint.

All written complaints received by the ADA Coordinator, appeals to the ADA Project Team, appeals to the Board of Commissioners, and responses from these groups will be retained by Tippecanoe County for at least three years.

Curb Ramp Survey Form

And

Instructions

# Curb Ramps

Construction/Alteration Date (circle one): Before 1/26/92 After 1/26/92

Facility Name/Address:	Date:
Location:	Surveyors:

Record your measurements in the blanks when they are provided. Do not circle a response for a question you are directed to skip. If your answer to a question is no, but the choices are "Y" and "n/a," circle "n/a" (not applicable).  
A circled "N" signifies a violation.

Describe each curb ramp's location: & INDOT TYPE	Curb Ramp D:
Curb Ramp A:	Curb Ramp E:
Curb Ramp B:	Curb Ramp F:
Curb Ramp C:	Curb Ramp G:

Refer to #	Curb Ramp (CR) Questions	Curb Ramp A	Curb Ramp B	Curb Ramp C	Curb Ramp D	Curb Ramp E	Curb Ramp F	Curb Ramp G
1	Is ramp of CR at least 36" wide (not including flared sides)?	Y N	Y N	Y N	Y N	Y N	Y N	Y N
2	Does CR have a running slope of 8.33% or less?	Y N	Y N	Y N	Y N	Y N	Y N	Y N
3	Does CR have a cross slope of 2% or less?	Y N	Y N	Y N	Y N	Y N	Y N	Y N
4	Does CR have a gutter slope of 5% or less?	Y N	Y N	Y N	Y N	Y N	Y N	Y N
5	Are transitions on and off CR flush and free of abrupt level changes? <i>Record the height of any level changes.</i>	Y N	Y N	Y N	Y N	Y N	Y N	Y N
6	Does CR have detectable warnings?	Y N	Y N	Y N	Y N	Y N	Y N	Y N
7	Can CR be blocked by legally parked cars?	Y N	Y N	Y N	Y N	Y N	Y N	Y N
8	Is the sidewalk at the "top" of CR at least 36" wide?	Y N	Y N	Y N	Y N	Y N	Y N	Y N
9	Does CR have flared sides? <i>If yes, answer one of the next two questions. If not, skip to question 10.</i>	Y n/a	Y n/a	Y n/a	Y n/a	Y n/a	Y n/a	Y n/a
9.a	If the sidewalk at the "top" of CR is 48" wide or more, is the slope of the flared sides 10% or less?	Y N	Y N	Y N	Y N	Y N	Y N	Y N
9.b	If the sidewalk at the "top" of CR is less than 48" wide, is the slope of the flared sides 8.33% or less?	Y N	Y N	Y N	Y N	Y N	Y N	Y N
10	If no flared sides, is there an obstruction or grass on each side of CR that discourages pedestrians from traveling across ramp? <i>If the CR has flared sides, skip this question.</i>	Y N	Y N	Y N	Y N	Y N	Y N	Y N
11	If CR is built-up to the curb, is it outside the path of cars? <i>If CR is not built-up to curb, skip this question.</i>	Y N	Y N	Y N	Y N	Y N	Y N	Y N
Answer the last two questions only if the CR is located at a marked crossing:								
12	Is ramp of CR contained in markings?	Y N	Y N	Y N	Y N	Y N	Y N	Y N
13	If corner-type CR, is bottom landing at least 48" long and contained in crosswalk? <i>If not corner-type CR, skip this question.</i>	Y N	Y N	Y N	Y N	Y N	Y N	Y N

Comments:

Marked with crosswalks per MUTCD? Ramp Depression within driveway?

This survey form is designed to assist you in identifying common barriers to access -- not all barriers. To identify all barriers, you must survey for compliance with §§ 4-10 of the ADA Standards.

---

## ADA Accessibility Survey Instructions: Curb Ramps

---

1

[§ 4.7.3]

Only measure the width of the ramp section of the curb ramp (labeled "ramp" to the right). The ramp section of a curb ramp is also known as the "ramp run." If the curb ramp has flared sides, which can also be seen in the illustration to the right, do not include them in the measurement. The ramp run must be at least 36 inches wide.

2

[§§ 4.7.2; 4.8.2; 4.1.6(3)(a)]

The running slope of the curb ramp is the slope in the direction that people travel when going up or down the ramp run. The arrow in the illustration to the left, aligned parallel to the ramp run and perpendicular to the curb, shows where to measure the running slope.

For new construction (when the curb ramp was built after January 26, 1991), the running slope of the ramp run must not exceed 8.33 percent. For alterations (when the curb ramp was altered after January 26, 1991), the slope must not exceed 10 percent for a 6-inch rise or 12.5 percent for a 3-inch rise.

3

[§ 4.3.7]

The cross slope of the curb ramp is perpendicular to the running slope. Unlike the running slope, which runs along the ramp, the cross slope is measured *across* the ramp. The arrow in the illustration to the right, aligned perpendicular to the ramp run and parallel to the curb, shows where to measure the cross slope. The cross slope of a curb ramp, or any accessible route, may not exceed 2 percent.

The gutter is the part of the street that borders the curb. To measure the gutter slope, place the level in the same position as the arrow in the illustration, with one end where the gutter meets the ramp and the other end towards the street. The gutter slope is parallel to the ramp and perpendicular to the curb. The gutter may slope up to 5 percent towards the curb ramp, but not more.

The transitions on and off the curb ramp are the points where the gutter meets the bottom of the ramp and where the top of the ramp meets the sidewalk. These transition points are required to be flush and cannot have any abrupt level changes. Record any level change at the transitions.

Detectable warnings are dome-shaped bumps that should cover the entire width and depth of the ramp run. Detectable warnings are designed to be felt underfoot or with a cane by people who are blind or have low vision, thereby alerting them of hazards — mainly, the transition from a pedestrian-only area to a roadway.

If the curb ramp you are surveying has detectable warnings but they do not cover the entire ramp run, explain how they are different in the "Comments" section at the bottom of the form. For curb ramps along public streets, the U.S. Department of Transportation (DOT) has deemed permissible a strip of detectable warnings that stretches across the width of the ramp run but covers only the two feet nearest the road. If the curb ramp you are surveying is located along a public street, you may circle "Y" if the detectable warnings comply with the DOT's design.

Curb ramps must be located where they will not be obstructed by parked vehicles. If the curb ramp you are surveying is along a public right-of-way or at a pedestrian crossing, vehicles should be prohibited from parking directly in front of the curb ramp on the street. If the curb ramp you are surveying is part of the accessible route from a parking lot to a building, the curb ramp may not lead into a parking space because the curb ramp will be obstructed when a vehicle parks in the space.

Curb ramps should have at least 36 inches of clear space at the "top" of the ramp, which can be seen in the illustration to the right. The 36-inch space at the top of the ramp allows pedestrians who are continuing along the sidewalk to bypass the curb ramp without traveling over it.

The measurement should extend from where the ramp run meets the level sidewalk (at the lower end of the arrow) to the opposite edge of the sidewalk (where the sidewalk meets the grass). Do not include any part of the curb ramp in this measurement.

Curb ramps either have flared sides or vertical edges called returned curbs. Using the illustrations below, determine whether the curb ramp you are surveying has flared sides or returned curbs and answer accordingly. The next two questions relate to the slope of flared sides, and you should answer them only if you determine your curb ramp has flared sides. If your curb ramp has returned curbs, skip to question 10.

## 9.a

[§ 4.7.5]

If the sidewalk at the top of the ramp ("x" in the illustration) is 48 inches wide or more, answer this question. If "x" is less than 48 inches, skip this question and answer the next one.

To answer this question you need to determine the slope of the flared sides to make sure it is 10 percent or less.

To measure the slope of a curb ramp's flared side, place a level on the flared side near the edge of the curb. The level should be placed so that it is parallel to the curb. Place the level in the same position and location as each of the arrows in the illustration to the left.

## 9.b

[§ 4.7.5]

If the sidewalk at the top of the ramp ("x") is less than 48 inches wide and the curb ramp you are surveying has flared sides, answer this question. Otherwise, skip this question.

To measure the slope of the curb ramp's flared side, place a level on the flared side near the edge of the curb. The level should be placed so that it is parallel to the curb.

Place the level in the same position and location as each of the arrows in the illustration to the left. The slope of the curb ramp's flared sides may not exceed 8.33 percent when there is less than 48 inches between the top of the curb ramp and the edge of the sidewalk at the other side ("x").

Answer this question only if you skipped the previous two questions because the curb ramp you are surveying does not have flared sides.

Curb ramps must have flared sides unless pedestrians would not normally walk across the ramp. A curb ramp may have returned curbs if it has non-walking surfaces (such as grass) or obstructions on both sides because these conditions would normally discourage pedestrians from walking across the ramp.

Generally, an object will qualify as an obstruction if it is immovable and is large enough to make it unlikely that pedestrians will walk across the ramp.

A built-up curb ramp typically consists of asphalt or concrete that is poured and shaped into a ramp that runs at a 90-degree angle away from an intact curb down to the roadway.

Built-up curb ramps cannot project into the path of cars. The "path of cars" includes anywhere cars are allowed to drive, including roadways, parking lot driveways, parking spaces, and access aisles.

Built-up curb ramps should have flared sides with a slope of 10 percent or less or have edge protection and handrails on the sides.

When a curb ramp is located at a marked crossing, the area where the ramp run ends must be contained within the marked crossing. The flared sides of a curb ramp do not have to be within the marked crossing.

A corner-type curb ramp is located at the center (or apex) of a corner and is often aligned to direct users into the middle of an intersection. As the illustration on the right shows, the alignment of a corner-type curb ramp means that people who travel down the ramp might be near the path of vehicular traffic once they enter the street. Therefore, if a marked crossing or crosswalk is provided, there must be a 48-inch deep area contained within the markings at the bottom of the ramp to protect people after they descend the ramp.

When taking this measurement, the measuring tape should be aligned parallel to the ramp run itself and should stretch from the intersection of the ramp and gutter to the innermost edge of the pavement marking.
